# **Scout Curry**

SF Bay Area | (510)-432-6301 | scurry222@gmail.com | http://www.scoutcurry.com | linkedin.com/in/scout-curry | github.com/scurry222

Tech Stack		
JavaScript, Python,	Git, Linux, NGINX,	Flask, Bootstrap, JQuery
HTML/CSS, SQL, C, Bash	Heroku, Firebase	React, Django, Blender

## Projects

### **TwoDoor** (JavaScript/Firebase/HTML/CSS)

10/19 - Current

Flashcard Tutoring App (deployed at <a href="https://holbie.app/">https://holbie.app/</a>)

- Single-page application with advanced ES6 JS usage, light use of JQuery.
- Used Agile Project Management to ensure quick production for deadline.
- Implemented Holberton School's REST API to fetch names and faces of a specific cohort.
- Applied Firebase's cloud storage for user-specific databases.
- GitHub TwoDoor

#### Holberton School - web back-end

4/20 - Current

(Python/Flask/SQLAlchemy)

- Covers advanced concepts of web development such as authentication and ES6.
- Create detailed flask apps ready for production.
- holbertonschool-web\_back\_end

## **AirBnB Clone** (SQL/Flask/Python/JavaScript/HTML/CSS)

6/19 - 10/19

- Built a functional AirBnB API clone with two storage engine models.
- Created RESTFulAPI with Flask that handles POST, GET, PUT, and DELETE requests.
- CORS setup so web client makes secure requests.
- GitHub AirBnB\_clone\_v4

## **Education / Experience**

## Holberton School (Full Stack)

01/19 - 11/19

#### **Full Stack Engineering Certification School**

- Operates with a project-based learning approach, strong emphasis on team skills.
- Covered foundational knowledge of programming structures and project management.
- Built C library functions from scratch and web pages with bare-bones web stack tools.

**Two-X** (C) 1/18 - Current

#### **Electric Skateboard Upgrade Kit**

- Managed distribution, assembly, and projects involving microcontroller programming.
- Oversaw entire startup life-cycle, from idea to bringing the product to market and breaking even.

## Navdy (Python, Arena)

5/16 - 9/17

#### **AR GPS Device**

- Startup that launched a heads up display product for cars.
- Wrote unit tests for product in a contract-based internship.
- Administered Arena PLM system.
