Scout Curry **Software Developer**

SF Bay Area | (510)-432-6301 | scurry222@gmail.com

GOAL: Junior developer looking for a programming position with an exciting company!

Python, JavaScript, C, HTML/CSS, SCSS, Bash   Git, Linux, NGINX, SQL   Pygame, Blender, Django, Flask, VSCode, JQuery

---

Projects

Holbie App (JavaScript/Firebase/HTML/CSS)

- ❖ A FlashCard Tutoring App deployed at https://holbie.app/
- ❖ Single-page application with mostly ES6 JS, light use of JQuery.
- ❖ Used Agile Project Management to ensure quick production for deadline.
- ❖ Uses Holberton school's API to fetch all names and faces of a specific cohort, to help students memorize their peers.
- ❖ GitHub - HolbieApp

AirBnB Clone (SQL/Flask/Python/JavaScript/HTML/CSS)

- ❖ Built a functional AirBnB API clone with two storage engine models.
- ❖ Created RESTFulAPI with Flask that handles POST, GET, PUT, and DELETE requests.
- ❖ Correct CORS setup so web client makes proper requests.
- ❖ Latest version: GitHub - AirBnB_clone_v4

Education / Experience

Holberton School (Full Stack Engineering Certification School)   01/19 - 10/19

- ❖ Operates with a project-based learning approach
- ❖ Given minimal direction how to solve programming challenges, students must work as a team to apply and understand the tools needed to answer project tasks and algorithms.
- ❖ Strong emphasis on team skills and foundational knowledge of concepts.

Two-X (Electric Skateboard Upgrade Kit)   1/18 - Current

- ❖ Contribute mostly with distribution and assembly, involvement in projects with microcontroller programming will be added to the website's product catalogue.
- ❖ Oversaw entire startup life-cycle, from idea to bringing the product to market and breaking even.

Navdy (AR GPS Device)   5/16 - 9/17

- ❖ Startup that launched a heads up display product for cars.
- ❖ Wrote unit tests for product in a contract-based internship.
- ❖ Helped administer Arena PLM system.
